Howard, I had the Arch 6/15/76 to you unfiled as a reminder because they had agreed to a standing request for all in any way related to any kind of medical evidence. You have probably seen my recent references to it without indicating I had copies of what they gave you. They have since sent me what I believe probably duplicates what you sent me. I've given Jim what I received so he could have it xeroxed. Probably get it back tomorrow. Then when one of the college people is here I'll see about having a comparison made, to see if either of us received what the other did not. If you have a list of what you received and did not send it that would help. If you sent it I have all that separately filed and marked not for use from when you wanted it reserved. If you do not and I have a list made I'll send it to you...If I did not tell you I've established new files for what was declassified beginning 1970. There are some exceptions, filed by subject, that I obtained separately. I'll probably be obtaining duplicates in the complete sets I've asked for. What is in the 1975 release has been in copying for me for six weeks. Anyway, I'll be filing this letter with what I received when I get it bask not only for its content, of what they do not have, but as a cross-reference. If you have not you might want to make these requests of Justice and to rephrase some to archives, like those relating to Harding. These are covered in my PA requests because for years I've known, through an accident, that they routed all from and to me through him. You might also want to read Rhoads' testimony before the Abzug committee on what he is to do to obtain the missing. Best, HW 10/27/76
